How to Use the Producer's Playbook

This checklist is built to take you from *idea to premiere* with as little chaos as possible.

It's not just a tick-and-go list — it's a roadmap. The more intentionally you use it, the smoother your production will be.

Step 1 — Read It Through Once

Get familiar with the full scope of the process so nothing catches you off guard later.

Step 2 — Work in Phases

The checklist is divided into 5 stages:

1. Research & Development
2. Pre-Production
3. Production
4. Post-Production
5. Marketing & Distribution

Tackle each stage in order but keep an eye on future steps to stay ahead.

Step 3 — Go Beyond the Box

When you tick an item, ask yourself:

- *Do I understand why this is important?*
- *Have I completed it to a professional standard?*
- *Is there someone more experienced I can delegate it to?*

Step 4 — Use the Notes Section

If a task has a specific contact, cost, or problem, write it down in *"Production Notes"* at the end. That way nothing slips through the cracks.

1. Research and Development

- [ ] **Source the Script:** Evaluate potential stories by considering genre, themes, target audience, and market trends. Write or option the script.
- [ ] **Secure the Rights *(if needed):*** Obtain legal permission from the script's owner to develop and produce the film.
- [ ] **Raise Development Funds:** Raise some funds for development of the script including a team of professionals, scriptwriters etc. (*Rule of thumb is $25,000 per $1MM. Development funds can go toward their retainers)*
- [ ] **Assemble a Development Team:** Build a core team including; Development Producer, Writer, and a Script Consultant to refine the project's vision and script. *Or you can go it alone.*
- [ ] **Write a Treatment:** Summarize the story in 2–5 pages, outlining the plot, characters, and key scenes to serve as a blueprint for the script.
- [ ] **Develop The Script:** Collaborate with writers to refine dialogue, structure, and characters, ensuring the script is engaging and production-ready.
- [ ] **Create a Pitch Deck:** Design a presentation highlighting the script's potential, including logline synopsis, mood boards, and market analysis, to attract financing and partners.
- [ ] **Script Lock *(for now):*** Finalize the current version of the script for budgeting and scheduling, understanding it may evolve during production.
- [ ] **Hire Key Production Heads:** Start with a Line Producer, then a Director, a Production Attorney and Cinematographer/ D.O.P, generally in that order.
- [ ] **Speak with Distribution:** Try and secure distribution early or at the very least, work on building relationships.
- [ ] **Create SPV Company:** Establish a Special Purpose Vehicle company for handling the project's finances, legalities, and liabilities.
- [ ] **Open SPV Company Bank Account:** Set up a bank account under the SPV to manage the project's finances clearly and professionally.
- [ ] **Perform a Script Breakdown:** Itemize all elements required for production, such as props, costumes, and locations, to inform the budget and schedule.
- [ ] **Identify Funding Sources and Secure Financing:** Explore various funding options (private investors, grants, crowdfunding, tax offsets) and secure the necessary capital.

2. Pre-Production

- [ ] **Create a Detailed Budget Breakdown:** Estimate costs for all production aspects, including salaries, equipment rentals, and location fees.
- [ ] **Create a Financing Plan:** Outline how the project will be funded, including investor contributions, loans, and other sources.
- [ ] **Hire Other Key Crew:** Fill essential positions, such as Special Effects Makeup/VFX, Casting Director, etc., based on the project's specific needs.
- [ ] **Develop Character Profiles:** Create detailed backgrounds and personalities for each character to guide casting and performance direction.
- [ ] **Cast Lead and Supporting Roles:** Select actors who best fit the character profiles, considering chemistry with other cast members.
- [ ] **Workshop with Actors and Director:** Conduct rehearsals and discussions to explore characters deeply and refine performances before filming.
- [ ] **Cast Remaining/Local Talent:** Fill remaining roles, focusing on fitting with the story's main cast and overall theme.
- [ ] **Obtain Talent Release Forms:** Secure legal agreements from all actors, ensuring permission to use their performances commercially.
- [ ] **Hire All Additional Crew:** Complete the team with technical, creative, and support staff necessary for production.
- [ ] **Scout and Secure Locations:** Identify and obtain permissions for filming locations that match the script's settings and aesthetic needs.
- [ ] **Negotiate Contracts:** Work out terms and conditions with cast, crew, and location owners, ensuring fair and transparent agreements.
- [ ] **Draft and Sign Contracts/ Agreements:** Formalize negotiations in written contracts covering rights, responsibilities, and compensation.
- [ ] **Plan the Visual Style:** Develop the film's visual style alongside the Director and Cinematographer, including lighting, colour palette, and camera work.

- [ ] **Create Storyboards:** Visualize critical scenes and sequences through drawings or digital images to guide the filming process.
- [ ] **Create a Shot List:** List every shot needed for the film, including angles and movements, to organize the shooting schedule efficiently.
- [ ] **Conduct a Risk Assessment:** Identify potential safety and logistical risks at locations and during specific scenes to mitigate hazards.
- [ ] **Secure Permits and Insurance:** Obtain necessary legal permissions and insurance coverage for locations, equipment, and personnel.
- [ ] **Technical Rehearsal/Pre-Visualization:** Practice complex scenes, stunts, or effects to ensure clarity and safety during the shoot.
- [ ] **Create a Production Schedule:** Plan shooting days, locations, and scenes in a detailed timetable, considering the best use of resources.
- [ ] **Finalize the Budget:** Adjust the initial budget based on pre-production decisions and commitments, ensuring it reflects current project needs.
- [ ] **Determine Equipment Needs:** List required cameras, lighting, sound equipment, and other essential gear.
- [ ] **Rent or Purchase Equipment:** Acquire all necessary equipment, opting for rentals to save costs unless purchasing is more economical.
- [ ] **Obtain Production Insurance:** Secure comprehensive insurance covering equipment, locations, crew, and unforeseen events.
- [ ] **Ensure Compliance with Legal requirements:** Verify that all production activities adhere to local laws, copyright rules, and industry regulations.
- [ ] **Create Call Sheets:** Distribute daily schedules to cast and crew, detailing call times, locations, and specific requirements for each shooting day.

3. Production

- [ ] **Daily Briefings:** Start each day with a meeting to review the schedule, address concerns, and ensure everyone is aligned on the day's goals.
- [ ] **Health and Safety Compliance:** Implement and monitor daily safety protocols.
- [ ] **Oversee Daily Shoot Operations:** Manage the set, ensuring that filming proceeds smoothly and efficiently, adhering to the schedule and maintaining quality.
- [ ] **Ensure All Crew Members Are Fulfilling Their Roles:** Monitor performance and resolve any issues to keep the production on track.
- [ ] **Ensure the Production Stays On Schedule and Budget:** Regularly review progress against the plan, adjusting as necessary to avoid overruns.
- [ ] **Facilitate Communication:** Ensure clear, continuous communication among all teams to address challenges promptly.
- [ ] **Oversee Transportation For Cast, Crew, and Equipment:** Coordinate logistics for moving people and gear between locations safely and on time.
- [ ] **Manage Accommodation:** Arrange suitable lodging for out-of-town cast and crew, considering comfort and proximity to shooting locations.
- [ ] **Manage Catering:** Provide meals and snacks, accommodating dietary restrictions and preferences to keep everyone well-fed and focused.
- [ ] **Manage On-Set Conflicts or Issues:** Address disputes or problems quickly and diplomatically to maintain a positive and productive environment.
- [ ] **Review Daily Footage For Quality and Consistency:** Check each day's shots for technical quality and adherence to the creative vision.
- [ ] **Adjust Future Schedules:** Revise plans to accommodate delays, unexpected successes, or changes in availability.

4. Post-Production

- [ ] **Select Post-Production Team:** Choose skilled professionals for editing, sound design, VFX, and music to refine the film's final form.
- [ ] **Oversee the Editing Process:** Work with the editor to assemble the film, focusing on pacing, narrative flow, and emotional impact.
- [ ] **Review and Approve Edits and Changes:** Evaluate cuts and revisions, providing feedback to ensure the film aligns with the intended vision.
- [ ] **Audience Testing:** Feedback can provide valuable insights into how the film might be received and highlight areas for improvement.
- [ ] **Lock Your Edit:** Finalize the edited version of the film, confirming that no further changes are needed before moving to sound and visual effects.
- [ ] **Coordinate with VFX Teams:** Supervise the creation and integration of visual effects.
- [ ] **Review and Approve Visual Effects:** Approve final VFX shots, ensuring they meet quality standards and fit seamlessly into the film.
- [ ] **Supervise Sound Editing and Mixing:** Oversee the creation of the film's soundscape, including dialogue clarity, sound effects, and musical score.
- [ ] **Secure Rights For Any Additional Music or Sound Effects:** Obtain licenses for all non-original music and effects used in the film.
- [ ] **Legal Clearance and Compliance** Check: Ensure that script, music, and visual content, have been legally cleared for use.
- [ ] **Colour Grading:** Adjust the film's colours and lighting in post-production to achieve the desired visual style and mood.
- [ ] **Digital Asset Management:** Organize and securely store all digital assets, including raw footage, edited files, and promotional materials. Create back-ups.

5. Marketing and Distribution

- [ ] **Identify Target Audience:** Define the primary viewership for the film based on genre, themes, and content, guiding marketing strategies.
- [ ] **Develop a Marketing Strategy:** Create a plan for promoting the film, including social media campaigns, trailers, and press releases tailored to the target audience.
- [ ] **Create Promotional Materials:** Produce critical marketing assets like trailers, posters, and stills that capture the film's essence and appeal.
- [ ] **Secure Distribution Channels:** Identify and negotiate with platforms showing the film, such as film festivals, streaming services, and theatres.
- [ ] **Plan the Premiere:** Organize a launch event to generate excitement and media coverage.
- [ ] **Coordinate the Release Schedule:** Schedule the film's release across different channels and territories, maximizing visibility and audience reach.
- [ ] **Finalize Financial Reports:** Compile and review all financial transactions related to the production, ensuring transparency and accountability.
- [ ] **Ensure All Financial Obligations Are Met:** Pay all outstanding invoices and fulfil contractual financial commitments to cast, crew, and suppliers.
